“ “ “ No. 1 “	1.75
“ “ “ extra “	2.25

Our Axes are not warranted. We use the Best Cast Steel obtainable and employ only skilled and experienced workmen. We know our goods give satisfaction. Axes are bronzed or painted red, black or blue as desired. Weights stamped on each Axe. The photo process of etching, used for these cuts, do not show fully the shape, that is, they will not scale, as they give the perspective. Our Axes are all Ridge Bitts as shown by wood cut of Michigan Pattern. The effect of the light upon the polished part was such that the ridge did not show in the etching. We make all patterns.

Our Axes are tempered the **old way** (one at a time) and **thoroughly tested**.
